

Halloween Safety Tips for Young Adults

Consider following fire safety tips during the Halloween season:

- ✓ Smoking Materials: Be careful if you attend Halloween events where guests are smoking. Improper disposal of smoking materials is a leading cause of deaths in young adults at house parties
- ✓ House Parties: Do not stay overnight at a house party if it is not safe. Overcrowding and guests who have been smoking are a recipe for a potential house fire
- ✓ Sources of Ignition: Be careful around seasonal sources of ignition at Halloween events such as burning candles or jack-o-lanterns
- ✓ Porch and Desk Collapse: Do not overload balconies and porches during a house party
